🚀 Course Summary

Module 7 — AWS Technical Essentials

📚 What We Covered Today

- **M1:** Cloud, IAM, shared responsibility
- **M2:** EC2, containers, Lambda
- **M3:** VPC, subnets, security layers
- **M4:** EBS, S3, storage classes
- **M5:** RDS, DynamoDB, purpose-built DBs
- **M6:** CloudWatch, ELB, Auto Scaling, serverless

🏗️ AWS Well-Architected Framework

- 🛠️ Operational Excellence
- 🔒 Security

- ⚡ Reliability
- 🚀 Performance Efficiency

- 💰 Cost Optimization
- 🌱 Sustainability

💡 Key Principles

- **Design for failure** — everything fails, plan for it
- **Use managed services** — offload undifferentiated work
- **Right-size resources** — monitor, then optimize
- **Security is job zero** — least privilege, encrypt everything

🚀 Next Steps

Certifications

- Cloud Practitioner
- Solutions Architect Assoc.
- Developer Associate

Learning

- AWS Skill Builder
- Well-Architected Labs
- AWS Workshops

Practice

- AWS Free Tier (12-month)
- Set billing alerts first
- Build personal projects
